

# PHASE CONTRAST MICROSCOPE FOR SEMEN ANALYSIS

MBL 2000 Microscope - The universal microscope with binocular or trinocular head, for general use in laboratories as well as schools and universities, with special configuration for semen analysis.

- Excellent phase contrast and bright field optics
- Rugged microscope stand, well engineered mechanics
- All models with built-in heating system and control unit for stage temperature setting
- Available with economic video and monitor system
- Made in Germany

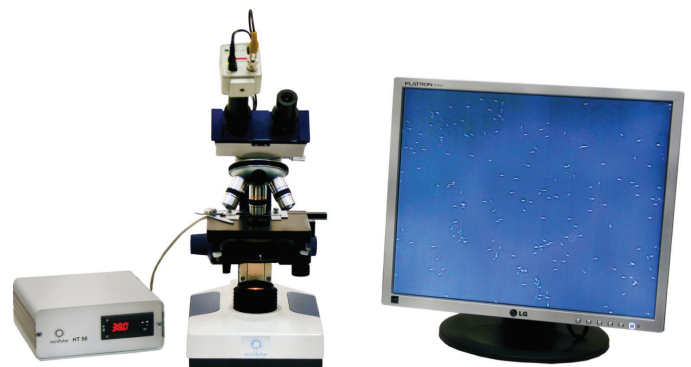

Binocular phase contrast microscope MBL 2000, phase contrast objective 20x, integrated heating system HT 10

REF. : [12010/1000](#)

Trinocular phase contrast microscope MBL 2000, phase contrast objectives 10x, 40x, 100x, integrated heating system HT 50, with black and white video camera and monitor
